## EXPERIENCE

---

### 12 WEEK BOOTCAMP UOFT

300 commits

---

## WHY ME

---

I'm diving into coding and I'm not stopping!  
Unfortunately I missed the silicon valley boom, but I'll take what I can get.

Great world, and I can't experience it all unless I learn the languages and get her done.

---

## SKILLS

---

### MERN

Javascript/CSS/HTML

Platforms: Github

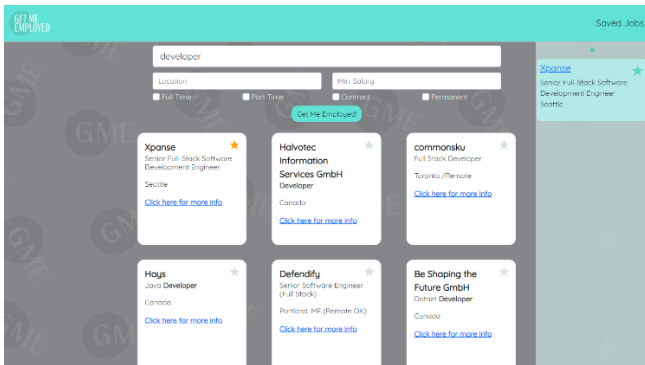

Technologies: NodeJS, React, Service Worker, IndexedDB,  
Bootstrap, jQuery

Databases: MongoDB, MySQL

Packages: Mongoose, Express, Handlebars, Inquirer, Dotenv

Projects: next page

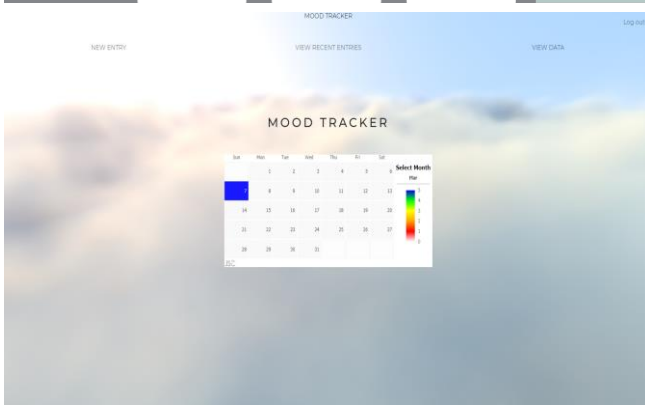

## PROJECTS

### Get-Me-Employed

#### 3<sup>rd</sup> party API

Job search front end API app. Enter details, save whichever you're interested in and click the cards to be redirected to their site!

### Mood-Tracker

#### Full stack restful API & MySQL

Mood tracker! Login, create a note (prompted if not logged in, too many characters, etc), check your latest notes (edit, delete) and view data on calendar or donut graph!

### React app

Your employee's information all in one place. Need to reach someone? Filter by name and/or city, boom. Get'er done.
